

PLANT GROWTH REGULATOR (PGR)

PLANT GROWTH REGULATOR PROGRAM

Utilizing a plant growth regulator program allows vegetation managers to reduce frequency of mowing which saves time and money. HighNoon controls more than 140 broadleaf weeds and brush species, all while offering the industry's most favorable environmental profile.

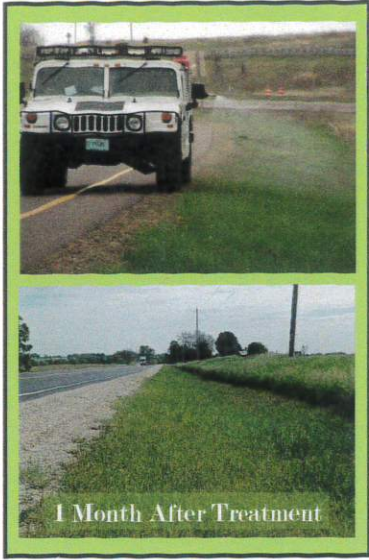

- Can be applied using winter brine equipment.
- Manage harmful toxic weeds that interfere with EMS & First Responders.
- Safe on Grasses and many beneficial forbs including Milkweed.
- No Grazing restrictions for any class of livestock.
